Who we are

Top Roto Ltd was established in 2009 in Cyprus. Since that time, our vision was to supply the market with quality products.

We are a small company devoted to add noticeable products to the international marketplace at competitive prices.

What we do

We produce by Rotational molding Storage Tanks, Garden Furniture , Flower Pots and other custom molded products you may require.

We have the ability to work with our customers as a team to design, develop and materialize their idea to a marketable product.

We listen to your needs and continuously widen our range of products to offer you more choices.

Mastery

Our machines, simple in operation, but sophisticated in control, reliably give the operator the ability of handing a properly cured product.

Moulds and tooling are designed and fabricated by expert craftsmen to produce the desired product.

Materials and colors are carefully selected to ensure durability and sustainability.

Well trained personnel, implementing designated procedures, are proud to deliver quality products.

Our commitment

We will keep on following the technology, updating our resources and using our experience in rotational molding wisely to continuously seek for the best possible outcome.

and... much more

Rotomoulded Flower Pots combine the unique aesthetic appearance with the color consistency and durability in a state of the art masterpiece, created not only to greet your favorite plant, but mainly to decorate your space. Quality is the outcome of passion for perfection. And we are proud to reveal this passion through our products.

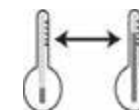

Lightweight

Our products are made of light weight material. You can easily move them around changing the appearance of your space

Environmentally friendly

We select our materials with major concern your health and ours. Polyethylene is a non-toxic material both, during production stage and during its lifetime. Its easily recyclable resins contribute in saving this suffering planet.

Temperature range

Our pots can withstand any weather at the most extreme temperatures humans experience.

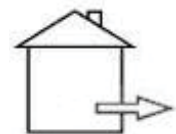

Maintenance - Cleaning

Our products require no maintenance. They are easily cleaned using normal kitchen cleaners.

Weather proof

All our pots are made of UV Stabilized Linear Low Density Polyethylene (LLDPE) which is offering a long lasting protection against UV radiation. Raw material is compounded with the colour, to ensure a long lasting brightness. The non porous material keeps the humidity in the soil since evaporation or water leakage is avoided.

Indoor and Outdoor Use

Our products can be used both indoors and outdoors. You do not have to worry about the pots any more... just select the right plant for indoors or outdoors. Your concern should be on your plant.

Shock Proof

The manufacturing process of Rotational molding provides stress free products which can withstand severe handling.
